Summary

Frontend developer with two years of experience building React and TypeScript interfaces.

Works closely with designers in Figma and with Node.js backends.

Education

Bachelor of Information Technology (Software Engineering), Institut Teknologi Fiktif (Sep 2019 – Jul 2023)

- CGPA 3.48; Final-year project awarded Best Poster.

Experience

Frontend Developer, Pasar Pixel Sdn Bhd (Aug 2023 – Present)

- Build customer dashboards in React and TypeScript with reusable component libraries.
- Write Node.js middleware to aggregate API responses for the web client.
- Turn Figma designs into accessible, responsive pages and improve Lighthouse scores.

Web Developer Intern, Tepi Studio Sdn Bhd (Feb 2023 – Jul 2023)

- Built marketing sites in JavaScript and React and fixed cross-browser bugs.
- Used Figma to prototype landing pages with the design team.

Projects

- Kedai Kopi Locator: React and TypeScript app with a Node.js API and map search.
- Design Token Kit: Component library driven by Figma tokens, written in TypeScript.

Skills

TypeScript, JavaScript, React, Node.js, Figma, HTML, CSS, Git, Jest
